RE: Patient results after 14 treatments of Enhanced Living's Spa Detoxification System.

Dear John:

Our office wanted to let you know how excited we are about the Enhanced Living's Spa Detoxification System. We have several patients going through the 14 sessions, but there is one in particular that I wanted to tell you about.

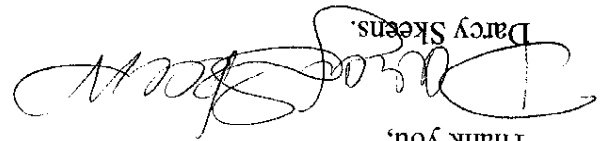

This patient is a 67 year old female who was complaining of lack of energy and feeling ill almost every day. She came into our office on March 8, 2007 and had a hair test done to check for potentially toxic elements within her body. We sent her hair test off to the Doctor's Data Lab in Illinois. When her test results came back a few weeks later, we noticed that her Total Toxic Representation was extremely high. In fact her percentile was beyond the charts range.

She started her Enhanced Living's Spa Detoxification at the end of October 2007 and finished all 14 treatments by mid-December 2007. Upon completion of her treatments, we did another hair test to see if there had been any change to the toxic elements within her body. We were so excited to see that her Total Toxic Representation had decreased significantly.

This patient stated that she is so pleased with these results and that she is feeling much better. Her energy has greatly increased and she doesn't feel ill on a daily basis anymore. She also stated that she noticed a change in her skin's appearance. She feels her skin is firmer that before starting the treatments. She is currently resting for 3 weeks before starting another 14 session treatment series.

I have provided you a copy of both test results, so that you may share with others, her story. Our office will keep you informed of her progress, as we believe that the Enhanced Living's Spa Detoxification System will continue to aid in the removal of some of her potentially toxic elements.

Thank you,

Darcy Skeens
