

My name is Patty Johnson, and I am a healthcare professional. I am writing this testimonial about a product called the Enhanced Living Ionic Foot Bath.

To give you an overview of what has happened since November of 2008, I will tell you a few facts. In November my dad had carotid artery surgery. He is a spry 84 year young gentleman. I expected him to be up on his feet within a week, but he never recovered from his surgery; and his health started to decline. When he returned to the doctor that had said that the surgery was necessary due to the amount of blockage in the artery, they ordered an MRI and discovered that he had suffered a massive stroke and also diagnosed a brain tumor in three lobes of his brain. The doctor said he had one to three months to live and that the tumor would start to be painful, that he would have seizures, and headaches. Well it has been four months now and none of those dreary symptoms have manifested. He is on hospice at my apartment, and my husband is his caregiver. He has no pain, eats four meals a day and the plumbing is working just fine. The only symptom he has is fatigue and atrophy syndrome. That is where the Ion Spa has done wonders. From the first treatment that he had with the detoxification system, he gained more alertness and a greater sense of well-being. I am going to continue treatments with the Ion Spa for the recommended protocol for his age and see just how much energy he can regain. I will be writing more testimonials as he progresses on the road to recovery. As for now he is well on his way to better health thanks to the Enhanced Living Ion Spa.

Sincerely,

Patty Johnson L.Ac.
