

Enhanced Living USA:

Dear John;

I have had a mild but persistent case of psoriasis for many years. The itching, flakes, and sore patches come and go, only to return. I have been using your Enhanced Living Ionic Foot Spa on a fairly regular basis for just over six months. The patches just stopped appearing after a couple of months and have not returned. I went to scratch a spot on the outside of my thigh that has been a problem area for me; lots of patches over time in the area, and realized that there were no sore patches or patches of dead skin. The skin was itchy because it was dry, but there weren't any psoriasis patches there. The ionic spa is the only thing different that I have been doing and it's working GREAT!

Thanks for making my psoriasis a thing of the past.

Sincerely,
Dave H.
