

## THE ENHANCED LIVING SPA

Reasons why the Enhanced Living ION SPA it is better than the AMD model we have used in the past.

1. The Enhanced Living unit comes with its own specifically sized foot tub so there is no wasted water.
2. It requires less salt therefore the array lasts longer.
3. Less salt draws out more toxins and the water isn't nearly as discolored which makes it easier to clean.
4. Array is encased well so there are no wires to get loose and it is heavier duty.
5. Control module is built into foot tub so it is easy to use, read, and set for each individual's needs.
6. It's much stronger. We can feel both the positive and negative ions drawing more when using it.
7. After using this spa, we have more energy, less joint pain and swollen ankles, eczema is gone, and stronger immune systems.
8. Our entire family feels much healthier after using this spa. It makes us feel better! We'd highly recommend it.

Gratefully,

Holly
