Upon graduating from Palmer College of Chiropractic in 1976. I thought I had all the answers on how to help sick people get well. One cause one cure was my mantra. My practice grew and life was good. The only thing was there were a lot of sick people falling through the cracks. What was missing? About five years ago a fellow doctor turned me onto energy healing and my life has not been the same. Correcting subluxation is still my primary focus but I now realize the importance of freeing up the connective tissue matrix and detoxifying the body.

Since introducing the Enhanced Living footbaths my patients and I have expressed unparalleled leaps in wellness. I sleep better, have more energy, have rejuvenated skin, and gather range of motion. Also my gym workouts have taken on new gains. I can truly say that the Enhanced Living footbaths have had a great impact on my practice. My patients who initially were skeptical are now referring family and friends requesting this new energy balancing protocol.
