Re: SOKOLOWSKI, WILLIAM
Age: 52
Sex: Male

I presented to the office of Dr. Anthony Calzaretto with a concussion due to two prior motor vehicle accidents, headaches, insomnia, muscle aches, dizziness, and vertigo. This condition occurred due to multiple injuries after my motor vehicle accident. For relief, I was on various drugs and medications for my condition, which included aspirin, nonsteroidal, Topamax, Imitrex, zonisamide, and Ambien. The medication does relieve symptoms temporarily, although I still suffered with pain and dizziness.

I was initially referred and recommended to the Ionic Detox Footbath by Dr. Anthony Calzaretto. I have been exposed to environmental changes in the past due to working in a nuclear environment, multiple car accidents, sports injuries, and a high stress workplace environment. I have seen many benefits as a result of using the Ionic Detox Footbath, which includes decrease in severity and frequency of headaches, a feeling of overall improved wellness, mental clarity, marked decrease in vertigo, and improved bowel function. I have recommended Ionic Detox Footbath to business associates and my girlfriend, Tamara Munson.

Although at first I was very skeptical, my results have been amazing. I would strongly encourage any and everyone to approach this therapy with an open mind and experience the many benefits to be gained from this therapy.

I hereby give permission of all or any part of my story to be produced with or without my name, address, and photograph and to be used in the interest of telling others about the benefit of chiropractic care.

Sincerely,

William Sokolowski
