

December 6, 2007

I heard about the ionic foot treatments and thought there was no way this could work, when I heard Dr. John Tolmosoff talk about how much better he felt after his first foot treatment I knew then it was something I needed to try. When it was explained to me what it could do for me I knew then that it was for me.

The reason I wanted to do the Enhanced Living footbath was so I could lose weight, I had tried everything and since I started the Ionic treatments I have lost 10 lbs. I was dealing with acne and my skin looks and feels so much healthier. I have so much energy now; I don't get the mental block at 3:00pm anymore. My overall health has improved, lowered my blood pressure and now that my metabolism is working, not only am I losing weight my thyroid is functioning the way it should be.

I am very happy that Dr. Tolmosoff is using the Ionic foot detox in his office its so nice to see the overall difference it has done.
