

December 5, 2007

Being a woman I was enticed by the change in metabolism, also in mental clarity. I heard about different foot spas but when I was introduced to the Enhanced Living ionic footbath, I knew it was different. I believed the testimonials I had heard about, one fact that it was a Medical Grade Ionic Footbath.

My energy level has heightened, metabolism- process my food better. My skin feels like it is tightening skin being soft. Calluses on my feet have almost diminished. My age spots have lightened and one is gone. Mental clarity has begun, mind has slowed down and racing has also seemed to lesson, which has caused me to be unable to stay focused.

I have received more than I first initially even wanted.
